The Hydreight App and business model is built with success in mind. This comprehensive platform allows for inventory acquisition and management, easy patient care options such as charting and telemedicine, and management of back office tasks including, but not limited to employee payouts. I highly recommend this organization to any medical business or professional that is seeking an opportunity to join the growing mobile medicine industry. Hydreight is the perfect partner to keep you steps ahead of the competition, and dominate the wellness community in your area.

Jessica Friedman

Hydreight Business Partner,
Palm Beach, Florida

Prior to using the Hydreight technology, I was trying to 'DIY' my business. I knew I wanted to help people with IV Vitamin Therapy, but I was struggling with managing multiple platforms, from billing, booking, charting, ordering, insurance, inventory, and operational workflows. I knew I wanted to make the client and IV specialist experience easy, so we could focus on outcomes. But I didn't want to be spending all of my time figuring out how to be an expert in the technology! When I discovered the Hydreight platform, I successfully launched my business and I have a team of amazing nurses, providing professional and high quality services, all from the ease of the Hydreight App. As an RN, with the desire to make a difference, this has been the best decision ever.
